**Head  
Office :-**

 Dr B Bhattacharya Road, Opp. Central Bank, West  
Patel Nagar, Patna, Bihar, Pin:- 800023

**Collection  
Center:-**

-  1. Avatar Market, Near Pachmukhi Mandir, Boaring  
Canal Road, Patna
-  2. Near Sai Baba Mandir, Lohia Nagar, Kankarbagh, Patna
-  2. R.M.S Colony, Near Post Office, Kankarbagh, Patna

**DEVLOK  
DIAGNOSTICS**

FOUNDER

**Dr. Aparna Sharma**

M.B.B.S (SKMCH)  
Biochemistry Department,  
PMCH

Dr Aparna Sharma has been absolutely, clear in her vision to provide the best and accurate diagnosis, so she has made a team of most experienced and committed consultants with her on these most advanced equipment's to generate the best possible results.

DOCTOR on BOARD

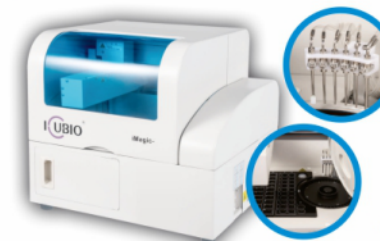

## OUR LABORATORY

- All routine and specialized Biochemistry, Hormone assays, Drug assays, cancer markers, Torch Tests, Elisa T.B., Pap Smear and Histopathology studies.
- Ability to process 400 samples/hour with same day reporting.
- Reputed suppliers such as Horiba, Alta, Euro Labs, Getein, Tosoh etc.
- Maintain robust documentation, control checks and Quality logs as per NABL.
- State of art report system. Tie up with Crelia Health.
- With our Crelia Health Lab Software App available on ios/ Android platforms doctors can view, get notified about their patients report from anywhere.

Employs full time staff of pathologists, trained technicians and quality manager with experience ranging from 5-25 years.

## BIOCHEMISTRY

### ➤ iMagic M-7 Automated Chemistry Analyzer

- The most compact automated analyser to perform chemistry & turbidimetry
- Constant throughput of 100 tests/hr.
- Reliable results and stable performance.

### ➤ Autolab Versa Semi-automated Biochemistry Analyzer

- Analysis Method- Absorbance, End Point, Fixed Time, Kinetic, 2-point end, Bichromatic & Multistandard.
- 8 Filters and 1 free positions.

## POCT DIVISION

### ➤ Getin 1100

- Getin1100 Immunofluorescence Quantitative Analyzer is an advanced on-site diagnostic analyzer, intended to deliver accurate testing results in minutes just from 3-4 drops of human specimens.
- Test Parameters- Cardiac Marker, Renal Function, Inflammation Monitoring, Diabetes, Fertility

### ➤ EL-120 electrolyte analyzer

- Na<sup>+</sup>, K<sup>+</sup>, Cl<sup>-</sup>/Ca<sup>++</sup>
- Analyses whole blood, serum, plasma & urine
- Calibration after 4 hrs / 8 hrs
- In built quality control with LJ Plots

## IMMUNOLOGY

### ➤ AIA-360 Automated Immunoassay Analyzer

- The most compact automated analyser to perform chemistry & turbidimetry
- Constant throughput of 100 tests/hr.
- Reliable results and stable performance.

### ➤ Alta Elisa Reader

- Reliable, accurate, flexible programming
- Accommodates different microplate geometries
- Fast result / report
- Storage of results

## MICROBIOLOGY

### ➤ Labomed® Lx400 Microscope

- From the most basic to the more complex laboratory applications, the Lx 400 stands strong as a truly modular system. With an Infinity corrected Plan Achromatic optica system, crisp & colorful image is obtained providing accurate findings & results.

### ➤ Mission® U120 Smart Urine Analyzer

- Automatic calibration before each test
- Up to 120 tests per hour in Continuous Mode
- Read strips with up to 14 parameters
- Robust construction
- Print up to 3 copies per test for record keeping data management ready
- Include RS232C and USB ports for data transfer to an external computer for LIS

## HEMATOLOGY

### ➤ Yumizen H500 Hematology Analyzer

- The Yumizen H500 is a compact hematology system and provides 27 hematology parameters, including a full WBC Differential with 6 WBC populations.  
Based on micro-sampling of 20 mL of whole blood,
